

LGR

■ **Ventilation grille LGR**

Rectangular, with adjustable blades.

- For covering rectangular air inlet and outlet openings, preferably in flat rectangular ducts.
- Centrally adjustable blades allow the individual modification of the passage area and thus the alignment and adjustment of the volume flow.
- Corrosion-resistant design made of galvanised steel and white stove enamelling.
- Delivery incl. installation frame which provides universal installation possibilities. In case of installation in thin-walled ducts, attachment with four screws.

QVK

■ **Ventilation grille QVK**

Square, with adjustable blades.

- Can be used to cover supply and extract air openings with square cross-section.
- Centrally adjustable blades allow the individual modification of the passage area and thus the alignment and adjustment of the volume flow.
- Corrosion-resistant design made of galvanised steel and white stove enamelling.
- Delivery incl. plaster frame. Therefore suitable for flush-mounted wall installation and screw attachment without a frame.

G 200 – 500

■ **Ventilation grille G fixed**

For attachment to ventilation openings in ceilings and walls.

- Made of high-quality, UV-resistant and break-resistant plastic.
- Flat design. Simple attachment with dowels.
- Sight screening with appropriate installation.

G 500	00801	Li. grey	450/500

G 100, 160

■ **Ventilation grille G fixed**

For covering and insertion in round ventilation openings.

- Made of high-quality, break-resistant plastic. Corrosion-resistant and thus ideally suitable for external and internal installation.
- Simple installation in round ducts due to rear conical plug-in connectors. Foam strip included in delivery for press-fit attachment. Fixed installation possible with four holes in the corners. When the grille is permanently mounted, the grille insert can be easily removed and replaced for cleaning.
