

■ Application Damper element to prevent the spread of fire and smoke. Suitable for installation in ventilation shafts and ducts with the required fire resistance class K 90-18017. For insertion in spiral ducts or for installation in

Application in residential and commercial areas, e.g. internal toilets, kitchenettes, etc.

walls and non-fire-resistant suspended ceilings using mounting ring (included in delivery).

■ Function

When an air temperature of +72 °C is exceeded, the fusible link responds. The built-in pressure spring automatically closes the valve.

Sheet steel construction with white powder coating.
Aerodynamically optimal design with inner cone and inlet ring.

Official approval

Delivery

The proof of suitability of these damper elements with throttle device for ventilation systems according to DIN 18017 has been provided by means of appropriate tests and resulted in the approval from the DiBT, Z-41.3-694.

Includes mounting ring made of galvanised steel sheet; each valve in a separate polybag.

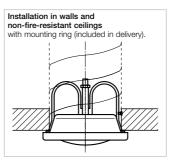

Special features

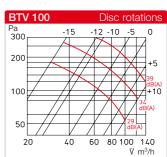

Installation and setting

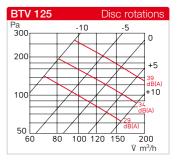

- □ No maintenance conditions.
- The installation and operating instructions contain exact specifications with regard to application and installation.
- Cleaning and inspection together with the associated ventilation system.
- Can be inserted by hand due to bayonet closure. Associated wall ring included in delivery.
- Officially tested fire protection disc valve with low air noise in case of high pressure drop.
- ☐ The specifications in the related approval must be observed.
- ☐ Installation in spiral ducts, shaft walls or non-fire-resistant
- Volume flow settings according to adjacent diagrams.
- shaft walls or non-fire-resistar ceilings.High damping value.

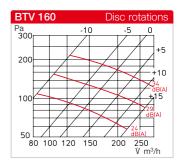

☐ Attractive, functional design.
