Electronic speed controller for the continuously variable speed control of alternating current fans

Multiple different fans can be operated with one controller until the rated load capacity is reached. A reserve of 10\% must be taken into account for dimensioning.

- Minimum output voltage can be adjusted to motor characteristics via potentiometer. The lower limit for smooth motor start-up must be maintained! Overload protection from built-in microfuse.
- Additional connection of indicator lights or shutter possible via uncontrolled output.
- Complies with EMC guidelines, DIN EN 50370, DIN EN 61000 / VDE 0838, DIN EN 55014, DIN EN 60669.

Design ESU 1 and ESU 3 An innovation by HELIOS
Both types are compatible with the current light switch ranges of many manufacturers.
Thus, the speed controller can be integrated in the intended switch range on site. Colour adjustment is also not a problem. The frame, central insert and rotary knob are taken from the "dimmer range" in the switch series.
Standard delivery includes: Controller insert, flush-mounted cover plate and rotary knob made of plastic in white.
$\square$ Operation indicator via light ring surrounding the rotary knob.

- Surface-mounted design

Closed plastic casing in attractive design.
$\square$ ESA 1 and ESA 3 with operation indication via light ring.

Important information Only motors which are suitable for electronic control through voltage reduction can be connected.

- Electronic speed control units, which function on the basis of the phase control principle, can generate motor humming noises which may be perceived as disturbing in the lower speed/ voltage range. Transformer control units which do not generate noise should therefore be used in noise-critical applications.

For flush-mounted installation 1 ~ alternating current, 230 V

For surface-mounted installation
1 ~ alternating current, 230 V

ESA 3

## BSX

 reverser1 ~ altern. current, 230 V
Can only be used with fan types: REW 150 and REW 200, series HV, H 200/4 and window fans GX.

For distribution box
installation
1~ alternating current, 230 V
ESU 1

ESU 3

## BSX

Ref. no. 00240
Max. load 1 A
(T 40 E$)$
Surface-mounted speed controller with reverser for reversible fans (supply and extract ventilation) in white plastic casing. Only for fans which are reversible using a changeover switch.

| Minimum load | 0.15 A |
| :---: | :---: |
| Protection category | IP40 |
| Wiring diagram no. | 480.2 |
| Dim. mm | W $80 \times \mathrm{H} 80 \times \mathrm{D} 65$ |
| ESE 2.5 | Ref. no. 01302 |
| Max. load 2.5 A |  |
| For installation in switch cabinets and distribution cabinets. |  |
| Compatible with 35 mm standard profile rails. |  |
| Minimum load | 0.1 A |
| Protection category | IP30 |
| Wiring diagram no. | 376 |
