Heat exchanger

- Large cross counterflow heat exchanger made of plastic, heat recovery efficiency up to 90 %.
- Type "ET" is equipped with highly efficient enthalpy heat exchanger for additional moisture recovery.

Fans

Two low-noise high-performance centrifugal fans with energy-saving EC motors ensure the air supply and extraction.

Ducts

Installation-friendly connection of intake, exhaust, extract and supply air through ducts with NW 125 mm using duct connectors (RVBD 125 K, accessories).

Condensate connection

Condensate drain at the bottom; ball siphon included in delivery. On-site connection to drain pipe.

Air filter

Clean outdoor air supply via ISO Coarse 65 % (G4) filter and 2nd filter stage via optional ISO ePM₁ 50 % (F7) or activated carbon filter. Extract air side equipped with an ISO Coarse 65 % (G4) filter in front of the heat exchanger. Easy filter maintenance without opening the unit.

Summer operation

Equipped with automatic bypass function and heat exchanger cover as standard.

Heat exchanger anti-icing protection

The standard frost monitoring system automatically controls the supply air flow volume and the optionally installed electrical preheater (KWL-EVH 250 W, accessories).

Control system

EasyControls 3.0 is the new, modern control system for all KWL compact units from Helios. The standard LAN interface allows the simple integration of the KWL unit in a network and the integration in Helios Cloud. The unit is optionally controlled via an external control element, on PC/laptop, tablet and Smartphone via the integrated web browser or on the move via the Cloud. See page 104 for functionality. Helios easyControls 3.0 is prepared for:

- The control elements KWL-BE ECO and KWL-BE Touch (optional accessories)
- The humidity sensor integrated as standard and other optionally available external air quality

sensors (KWL-CO2 eC, -FTF eC, -VOC eC, accessories) enable automatic, demand-controlled ventilation.

- Connection to building control system via integrated Modbus interface or optional KNX module (KWL-KNX Connect, accessories).

Electrical connection

Fixed connection via a mains connection cable 3 x 1.5 mm², approx. 2 m with wire end ferrules.

Accessories – Functional description (see right for details)

KWL 250 W can be individually expanded with the following accessories:

- Control element ECO**
 - Three ventilation profiles selectable via slide switch.
 - Control voltage can be measured directly on the control element.
 - LED for visual indication of operating statuses, e.g. filter replacement and faults.

Control element Touch

- Touch control element with graphic display and user-friendly menu navigation:
 - Commissioning assistant.
 - Selection of four ventilation profiles.
 - Adjustment of an individual weekly programme.
 - Adjustment of parameters for room sensors.
 - Indication of e.g. filter replacement, operating statuses and error messages.
 - Different access authorisations and child lock.
 - Other functions (see operating instructions).

KNX/EIB module

For connecting the ventilation unit to the building control system via the KNX Connect module.

Room sensors

Room sensors, which measure the mixed gas, CO₂ concentration or relative room air humidity, are available for automatic operation and optimal air exchange.

Post-heating

Helios easyControls 3.0 can be used with an electric post-heating element (EHR with KWL-LTK, accessories). The autonomous operation of the warm water heating element can be controlled via an air temperature control (WHS HE, accessories) independently from Helios easyControls 3.0.
