Attachment filter element VFE For installation in front of disc valves for greasy, contaminated

deposits. Casing made of galvanised steel sheet, white, plastic powder-coated. Filter made of dimensionally stable aluminium filter fabric with 324 cm² free filter surface and aluminium frame.

Door ventilation grilles

Unobtrusive, sight screening ventilation grille made of break-resistant plastic for installation in door leaf.

See product page for detailed description.

Cleaning set

Cleaning set for air distribution systems flexpipe and renopipe.

The universal cleaning set KWL-RS is ideally suitable for cleaning the flexpipe duct systems (DN 75, DN 63) and the renopipe air distribution system (DN 100). Application is possible either by pushing (for short distances) or pulling. In case of longer duct sections or narrow bends, the round nylon brush is simply pulled in the

direction of the distribution box, where the 90° bend is used for the intake connection. This is used to easily remove the dust loosened by the round nylon brush with a commercially available vacuum cleaner.

Delivered in a practical transport bag.

Delivery: Per 1 pc.

- Reel with flexible GFK wire (20 m)
- Round brushes DN 63, 75, 100
- 90° bend and seal for intake
- connection DN 56 Adapter DN 56/40, DN 56/32.

Air temperature control

Air temperature control for KWL units with PWW post-heater. For air heating control of the PWW post-heater integrated in KWL WW types. Consists of thermostat with remote adjustment and remote sensor. Simple, cost-effective and quick-to-install solution. Temperature range 8 – 38 °C. WHST 300 T38 Ref. no. 08817

Hydraulic unit

Controls the water temperature of the PWW heating element using a three-way valve actuator 24 V (0-10 V) and thus the heat output transferred to the air. Delivered as a complete unit, incl. VL-/RL temperature display, circulating pump and flexible connection hoses.

WHSH HE 24 V (0-10 V) No. 08318

WHR: The values apply for supply air temp. 0 °C and flow/return temperatures: 1) 90/70 °C, 2) 60/40 °C.

Air temperature control

Air temperature control for warm water heating element WHR. Ideal for use as supply air heater. Consists of thermostat incl. duct

temperature sensor (with 2 m capillary tube) and valve. Provides a constant supply air temperature. Simple, cost-effective and quickto-install solution.

Temperature range 20 – 50 °C. **WHST 300 T50** Ref. no. 08820
