

Flat duct system FK

Underfloor duct system made of galvanised steel sheet, specifically developed for domestic ventilation. The optimal solution for concealed air ducts; ideal for air distribution in new buildings.

■ Properties

- All components made of galvanised steel sheet, corrosion-resistant and non-flammable.

■ Available in two sizes

- FK 150 x 50 mm for volume flows up to 90 m³/h.
- FK 200 x 50 mm for volume flows up to 140 m³/h.

■ Duct concept and installation

- Flat design and rigid construction allow easy installation in unfinished flooring.
- Connection using external connector. Moulded parts with integrated sleeve (insertion depth approx. 35 mm). The smooth internal walls result in low flow resistances and do not create obstacles for dirt deposits. Cleaning (disinfection) is still possible.
- The distribution box, which must be installed per floor for extract and supply air delivery, simplifies the duct layout.
- Flat silencers (FK-SD) can be installed in the duct system to protect noise-sensitive rooms, e.g. bedrooms.
