

Description for all types

- **Casing**
 Made of galvanised steel sheet, types HQ and HW have additional two layer lacquer coating in papyrus white.
- **Impeller**
 High performance characteristics with profiled blades made of plastic, aerodynamically optimised for application, dynamically balanced.
- **Drive**
 Energy-saving, speed-controllable external rotor EC motor in protection category IP54 with the highest level of efficiency. Maintenance-free and radio interference-free, excellent electromagnetic compatibility (EMC), ball bearing mounted.
- **Motor protection**
 Integrated electronic temperature monitoring system for EC motor and electronics.

- **Electrical connection**
 Standard terminal box (protection category IP54) mounted to external cable, or on outside of duct for HRF.
- **Protection grille**
 Made of powder-coated steel for HQ and HW in accordance with DIN EN ISO 13857.
- **Power control**
 All types are continuously controllable via internal (delivery) or external speed potentiometer. Control is also possible via three level switch or continuously variable via universal control system or electronic differential pressure/temperature controller. See type table. Performance levels are shown on the performance curve as examples.

- **Installation**
 Installation possible in any position.
- **Noise levels**
 The total level and range for the sound power level and sound pressure level at 4 m free field conditions are specified above the performance diagram for the average operating point on the inlet/outlet side. The total sound pressure level at 4 m (free field conditions) is also specified in the type table, as well as the table below the performance diagram for various voltages. See page 14 f for noise emissions and room acoustics.
