Dimensions VAR and B VAR 900 F300/F400

All dim. in mm

- **Casing**
 Duct with flanges on both sides DIN 24155 pt. 3. Welded construction, hot-dip galvanised. Welded guide vane with inner hub for mounting the flange motor, hot-dip galvanised.
- **Impeller**
 Optimised for high pressure and volume output. Special development with spatially curved hot-dip galvanised steel blades
- **Motor**
 Direct through IEC three phase motor.
- **Series VAR**
 Enclosed design IP54. With condensation drain holes upon request, installation type specification necessary when ordering for this purpose.

- **Series B VAR**
 Efficient IE3 three phase motor (smoke extraction motors F300 and F400). Pole-switching fans with IEC standard motor. Protection class IP55. Insulation class H. External cable with sheathing.
- **Motor protection**
 □ **Series VAR**
 All types (except explosion-proof and pole-switching models) have PTC resistors. For effective motor protection, these must be wired to a full motor protection device (see type table). Motors without PTC resistors must be protected with an on-site motor-protective circuit-breaker.
- **Series B VAR**
 All types (except pole-switching) have PTC resistors as standard and must be protected with

aa full motor protection device (MSA, Ref. no. 01289). This must be bridged in smoke extraction situation.

- **Series B VAR**
 Suitable for installation within and outside of the fire zone.
- **Electrical connection**
 Standard plastic terminal box (protection class IP54) (series VAR) or in temperature-resistant design (series B VAR), outside of duct.

■ Safety information B VAR

Protection against accidental contact for impeller must be ensured by installation pursuant to DIN EN ISO 13857.

■ Noise levels

See information on sound power levels above the performance curves. The lower sound pressure level can be determined using the diagram on the "Technical information" page. Noise emissions and room acoustics see page 5.
