

A technical drawing of a pipe. The drawing shows a vertical pipe with a double-line outer boundary and a single-line inner boundary. Two dimension lines are shown: one on the left side and one on the right side. The left dimension line is labeled with the diameter $\phi 286$. The right dimension line is labeled with the diameter $\phi 256$ i.L. The dimension lines have arrows pointing to the pipe's boundaries and are terminated by short horizontal lines.

$\phi 286$

$\phi 256$ i.L.
